PROFESSIONAL SUMMARY

DevOps and AI-focused Computer Science student with hands-on experience in Python automation, cloud computing, and AI-powered application development. Skilled in building full-stack systems, Retrieval-Augmented Generation (RAG) pipelines, and automation workflows using modern tools and cloud platforms. Experienced with Linux environments, AWS services, and Git-based development workflows. Passionate about developing scalable, intelligent systems that combine cloud infrastructure, automation, and AI technologies.

EDUCATION

B.Tech in Computer Science Engineering (2023 – 2027)
GIET University, Gunupur

TECHNICAL SKILLS

Programming & Scripting: Python, Bash, JavaScript, PHP
Web Technologies: HTML5, CSS3, React (basic), Responsive UI Development
Databases: MySQL, ChromaDB, NoSQL
DevOps & Cloud: AWS (EC2, S3, IAM), AWS CLI, Linux, CI/CD Concepts, Cloud Deployment
AI & LLM Technologies: RAG Pipelines, LangChain, Vector Databases, Prompt Engineering
Testing & Reliability: unittest, Pytest (basic), Debugging, Log Analysis, Regex
Tools & Platforms: Git, GitHub, VS Code, XAMPP, Streamlit, n8n Automation

PROJECTS

Python Automation & Jarvis AI Assistant

- Automation-focused assistant for command execution and system interaction
- Python scripts for file handling, log analysis, and reliability testing

AI StoryTeller – Image to Story Generation System

- AI-powered web application that converts images into creative stories using image captioning and LLM-based text generation
- Implemented a two-stage AI pipeline combining BLIP image captioning with generative storytelling models
- Built an interactive web interface allowing users to upload images and generate dynamic narratives

AI-Powered Context-Aware Learning Assistant

- Full-stack RAG-based educational assistant for resolving student doubts using syllabus-aware learning resources
- Implemented semantic document retrieval, conversational memory, and contextual explanations
- Built using React frontend, Flask backend, LangChain pipeline, ChromaDB vector database, and LLM integration

Multi-Agent AI YouTube Automation System

- AI automation system that generates YouTube content using multiple coordinated agents
- Implemented research, thumbnail generation, and orchestration agents using n8n workflows and Groq LLM APIs
- Integrated Telegram for automated interaction and SerpAPI for web research capabilities

Student Web Platform

- Full-stack academic platform with authentication and database integration
- Modular design supporting scalability and future cloud deployment

Streamlit Applications

- Attendance Calculator, OMEN Chatbot, ISL Project
- Interactive dashboards with real-time inputs

INTERNSHIPS

Summer Intern – NTPC-SAIL Power Company Limited (NSPCL), Rourkela, Odisha (Jun 2025 – Jul 2025)

- Completed summer internship in C&I (Control & Instrumentation) Department
- Gained exposure to industrial control systems and networking of DDCMIS systems

Web Development Intern – YHills (Feb 2024 – Apr 2024)

- Developed responsive webpages and event-based forms

Web Development Intern – Oasis Infobyte (Jun 2024 – Jul 2024)

- Built landing pages, portfolio site, and calculator application

CERTIFICATIONS

AWS DevOps: Getting Started on DevOps on AWS

AWS Command Line Interface (CLI) Basics

KodeKloud: RAG Crash Course – Retrieval-Augmented Generation

IBM SkillsBuild: 1M1B AI + Sustainability Virtual Internship

Google: Crash Course on Python

Google: Using Python to Interact with the Operating System

Google: Troubleshooting and Debugging Techniques

Google: Introduction to Git and GitHub

Infosys: Introduction to NoSQL Databases

Firebase & DevOps Workshops

Google Student Ambassador Program
